ŒNOCELL

ACTIVATOR AND REGULATOR OF ALCOHOLIC FERMENTATION

Conforms with the International Oenological Codex. Not derived from genetically modified organisms. Allergen free.

Activator and Regulator of alcoholic fermentation composed by cellu losic fibers activated by a specific physical process.

Detoxifying Action

Œnocell is inert, with high purity and has the ability to absorb toxic me tabolites which may interfere with the normal yeast development and other unwanted toxins produced by moulds, yeast and bacteria pres ent in the mass

Balancing Action

Must turbidity during fermentation is a very important parameter in determining final wine quality.

On must too clear, Œnocell allows to return to the turbidity recommended values, thus having regular and high quality fermentation.

Supporting action

Thanks to the wide fibrous surface, Œnocell shows a useful supporting action for yeast cells, allowing a better dispersion in the mass during fermentation.

Easy and safe to use

Enocell is pre-hydrated and it allows an easier and faster dispersion and therefore reduces working-time. Besides, the dust absence grants operators' safety.

Composition

Polysaccharides activated with physical process.

Characteristics

Appearance: fluffy, humid. Colour: White

Dosage

20-40 g/hl in alcoholic fermentation. 60-80 g/hl for musts with NTU<50.

How to use

Dissolve the product uniformly in a water or must (ratio 1:10), directly to the mass.

Storage

Store in a cool and dry environment.

Once opened, keep the package properly closed in a cool and dry place.

Pack sizes

Code EXPO0118030 - 5 kg packs
